A Blessing.

To mankind the addition of one cheap,

wholesome dish for the table is a blessing.

Ignorance and negligence have kept several such dishes from the knowledge of most people in the United States who reside away from markets. Among such articles one of the least used in the country is asparagus. Thousands of families never taste this most wholesome of all vegetables, and of those who have ON TIME by Old On-Time, and he by Stone-wall Jackson. It contains a quality that dissolves urinary calculi [or stone]. A space of ground a yard and a half square will furnish enough asparagus for a family-yielding a dish every other day for two or three months. It must be cut next to the ground before it gets over one foot high. So rapidly does it produce that the little space referred to will soon overgrow and spoil it for all use till the next year if not daily watched. Like the tomato its use stimulates a taste for it that grows rapidly unless disgusted by overeating. The longer one uses it the better he likes it. Every garden should have a bed of this most wholesome of vegetables. Prepare the ground well with abundant stable manure and get a few roots, sever them and cover in ground. In two years it will be ready for use, as it comes the very first of all eatables in the spring and at a time bollnis.
